Career Objective

To be involved in creative and constructive work that would not only satisfy my thirst for learning and serving the organization but also enhance my skills for solving diverse technical problems to benefit the company and society as a whole.

Education

09/2011 - 01/2016

Makerere University Kampala Uganda

- Earned a bachelor's degree in Computer Engineering

Work Experience

09/2018 - 03/2020

Software Engineer

Andela Uganda Limited

- **Full-stack developer** on **Andela Eats** which is a platform used for managing meals in Andela. I worked with ReactJs, Javascript, HTML, CSS, SASS, Redux, Nodejs, Express Js, Postgresql, Mocha Sequelize, Git, Pivotal Tracker. I wrote unit tests using Jest and Enzyme.
- **Frontend developer** on **Activo** which is an asset management system used in Andela. I worked with ReactJs, Javascript, HTML, CSS, SASS, Redux, Typescript, Git, Pivotal Tracker. I wrote unit tests using Jest and Enzyme, and end to end tests with cypress
- **Technical team lead** on **Barefoot Nomad** which is a platform to manage company travels. My role is to review code, mentor the junior developers on the project and merge pull requests. We use ReactJs, Javascript, HTML, CSS, SASS, Redux, Typescript, Nodejs, Express Js, Postgresql, Sequelize, Git, Pivotal Tracker.
- **Superwoman program Leader**. This is an initiative to give back to the community where we train women in Uganda software development skills. They work remotely on a project in React Js, Javascript, Node Js HTML and CSS, Git, Trello.

02/2019-present

Freelance

Frontend Engineer on Heritage explorers: This is a tours and travel web application. I am working with Javascript, React, CSS, SASS HTML.

01/2017-08/2018

Weighbridge Operator
Uganda National Roads Authority

- **Full-stack developer on Wanted:** This is a project I worked on to ease the processes of tracking impounded vehicles that escape from the weighbridge. I worked with Javascript, HTML,CSS,Nodejs, Express Js, Postgresql.
- Maintaining weighbridge software
- Writing daily weighbridge reports

08/2014 - 02/2015

Junior Software Engineer
National Water and Sewerage Corporation Kampala Uganda

- Frontend developer on CMMS(Computerized Maintenance Management System) which is a system to manage maintenance requests and asset allocation. I worked with HTML, CSS, bootstrap, Vanilla Javascript.
- Project management
- Leadership skills
- Teamwork
- Remote work
- Effective communication
